ABOUT ME

Frontend Developer with 3 years of professional experience building React/Next.js products: web applications, e-commerce platforms, Telegram Mini Apps, and Web3 interfaces. Work with TypeScript, React, Next.js, Redux Toolkit, REST APIs, and WebSockets. Optimize performance, design reusable components, and build maintainable architectures. Over the past year, contributed to growing a crypto exchange product to 100,000+ MAU and implemented onboarding that reduced user churn by 35%.

KEY SKILLS

Languages & Frameworks: JavaScript, TypeScript, React, Next.js, Vue.js

Architecture: Feature-Sliced Design, Flat Architecture, Atomic Design

Integrations: REST API, WebSockets, TonConnect SDK, Web3, Smart Contracts

Frontend: Redux Toolkit, Zustand, SSR, ISR, React Hook Form, Zod, CSS Modules, Tailwind CSS, ShadcnUI

Performance: Core Web Vitals, code splitting, lazy loading, dynamic imports, SEO

Tools & Processes: Git, Docker, code review, unit testing, integration testing

Additional: mobile development with React Native, Backend with Next/Nest/Go

Languages: Russian, English, Kazakh

WORK EXPERIENCE

Frontend Developer | AURAxCAPITAL

June 2024 — September 2026

Tech Stack: React.js, Redux Toolkit, Tailwind CSS, ShadcnUI, REST API, WebSockets, TonConnect SDK, Web3, Smart Contracts

- Developed the frontend of a crypto exchange for TON and EVM networks: wallet connections, swaps, limit orders, DeFi pools, and NFT operations.
- Launched Telegram Mini App @auraxcryptobot with full integration of the TON ecosystem, scaling the product to 100,000+ MAU.
- Designed and implemented interactive onboarding, reducing user churn by 35%.
- Implemented FSD architecture and a unified code style, established a code review process; coordinated a team of 3 frontend developers.
- Created a library of reusable UI modules and standardized integration approaches, reducing the development time for new screens by 50%.

Frontend Developer | BRSYS

May 2023 — June 2024

Tech Stack: React.js, Next.js, SSR, ISR, React Hook Form, Zod, CSS Modules

- Developed the frontend for an e-commerce store and migrated the existing React application to Next.js.
- Implemented SSR and ISR for key pages, improving SEO metrics and loading speed.
- Optimized client-side rendering using dynamic imports, code splitting, and lazy loading, improving Core Web Vitals and page load speed by 27%.
- Built a reusable component system; integrated REST APIs, authentication, forms, and data validation.

EDUCATION

Bachelor's Degree, Computer Engineering and Software Engineering

S. Seifullin Kazakh Agrotechnical University (KATU) | 2020 — 2024
