AURAxCAPITAL

Moscow, auraxcapital.com/

Frontend team-lead developer

I created a mini Telegram App in React.js that teaches users how to work with crypto exchanges in a gamified way. I developed interactive mini-games where users practiced trading operations while learning about the market in a safe environment.

I integrated support for TON wallets, implemented functionality for purchasing our company's NFTs, and added the ability to perform swap/limit cryptocurrency operations.

As a result, the platform became not only an educational tool but also an engaging gaming space that encouraged users to master crypto trading through interactivity and immersion.

IT, System Integration, Internet

• Software Development

Frontend-developer

I designed and developed an online store from scratch using React.js, and later, based on new management requirements, fully migrated it to Next.js to improve performance and SEO optimization. Implemented SSR and ISR, which significantly accelerated page loading and improved search engine visibility.

I set up a flexible architecture with reusable components, ensuring ease of scaling and maintenance. Integrated backend APIs, payment gateways (Stripe, PayPal), as well as authentication systems (NextAuth, Firebase Auth). Optimized client-side rendering through dynamic imports, code-splitting, and lazy loading.

As a result, the project became faster, more reliable, and more user-friendly, with improved Core Web Vitals metrics, delivering a better user experience and higher conversions.

Self-Employed / Freelance
www.weblancer.net/users/qwertycamedy/

Frontend-developer

I developed everything from simple landing pages to high-load web applications using React/Next.js, with a strong focus on rendering optimization, SSR/ISR, and state management. Implemented custom components and dynamic interfaces, ensuring lightning-fast page loads and a seamless user experience.

Education

Bachelor

2024
Bachelor

S. Seifullin Kazakh Agrotechnical University
Faculty of Computer Systems and Software Engineering (CSSE), Department of Computer and Software Engineering (CSE)

Skills

Languages

Kazakh — Native
