SUMMARY

Frontend Developer with 5 years of experience building React/Next.js products: web applications, e-commerce platforms, Telegram Mini Apps, and Web3 interfaces. Skilled in scalable architecture design, performance optimization, and API/WebSocket integrations. Grew a crypto exchange product to 100,000+ MAU and cut user churn by 35% through a redesigned onboarding flow.

CORE SKILLS

Languages & Frameworks: JavaScript, TypeScript, React, Next.js, React Native, Vue.js

Architecture: Feature-Sliced Design (FSD), SOLID, Clean Architecture

Integrations: REST API, WebSockets, TonConnect SDK, Web3 / Smart Contracts

Tools & Practices: Unit & integration testing, Git, Docker, code review, basic Backend/Fullstack development

Languages: Russian, English, Kazakh

EXPERIENCE

Frontend Developer — AURAxCAPITAL

June 2024 — April 2026

Stack: React.js, Redux Toolkit, Tailwind CSS, ShadcnUI, REST API, WebSockets, TonConnect SDK, Web3, Smart Contracts

- Built the frontend for a crypto exchange across TON and EVM networks, covering wallet connection, swaps, limit orders, DeFi pools, and NFT operations.
- Launched the @auraxcryptobot Telegram Mini App with full TON ecosystem integration, growing the product to 100,000+ MAU.
- Designed and implemented an interactive onboarding flow that reduced user churn by 35%.
- Introduced an FSD architecture and a unified code style, established a code review process, and coordinated a 3-person frontend team.
- Built a library of reusable UI modules and standardized integration patterns, cutting new-screen development time by 50%.

Frontend Developer — BRSYS

May 2023 — June 2024

Stack: React.js, Next.js, SSR, ISR, React Hook Form, Zod, CSS Modules

- Built the frontend for an e-commerce platform and migrated an existing React application to Next.js.
- Implemented SSR and ISR for key pages, improving SEO performance and page load speed.
- Optimized client-side rendering using dynamic imports, code splitting, and lazy loading, improving Core Web Vitals and page load speed by 27%.
- Built a reusable component system and integrated REST APIs, authentication, forms, and validation.

Freelance Frontend Developer — Self-employed

April 2021 — May 2023

- Delivered 25+ commercial projects for 15+ clients, including corporate websites, landing pages, e-commerce stores, admin panels, and web applications.
- Built websites and web applications with React and Next.js for clients across multiple industries.
- Integrated APIs, responsive layouts, CMS platforms, and business logic; owned projects end-to-end from scoping to release.

EDUCATION

Bachelor's Degree, Computer Engineering and Software

S. Seifullin Kazakh Agrotechnical University (KATU)

2020 — 2024
